

## WOMEN'S TECH TRAINING PROGRAM

#NowWeGo #TourGuide #FunCulture #ToughLove #NeverSettle #NowWeDisrupt #NowWeLove

***MTX Group (MTX) is a global technology consulting firm that provides expert guidance, cloud technology solutions and a powerful Artificial Intelligence (AI) platform that accelerates business in the private and public sector. We are looking for 20 women in the Vermont area who are looking to gain or enhance their technology skills to become more marketable.***

### Who

The intended audience is women in the Vermont area looking to start a career in technology and grow their marketable skills.

### What

MTX will be offering a free 12-week program for women looking to start a career in technology.

### Where

The program is entirely virtual. Training sessions are recorded for flexibility.

### When

The program will begin in October 2022 and run for 12 weeks.

### HOW

There will be two six-week sessions. In the first six weeks, participants will attend training sessions on Salesforce admin. Salesforce is a cloud-based customer relationship management software that helps businesses connect with and get more information about their customer base. There will also be opportunities to attend personal development sessions providing resume tips, interviewing skills, presentation skills and more.

The second six weeks will provide real-world application. Participants will be given a team project which they will work on both individually and with their assigned team. Teams will present their recommendations at the end of the program. They will also attend sessions where MTX will share use-cases to provide insight into how customer issues are solutioned.
